

## HOW AMERICANS USE ELECTRICITY

The latest data from the U.S. Energy Information Administration shows the combined use of clothes washers and dryers, computers, dishwashers, small appliances, and other electrical equipment (noted as “all other uses” below) accounts for nearly 40% of electricity consumption in American homes.

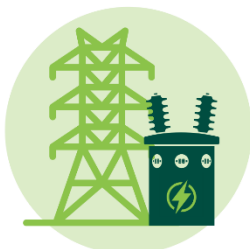

Source: EIA, Annual Energy Outlook 2020

<sup>1</sup>Includes consumption for heat and operating furnace fans and boiler pumps.

<sup>2</sup>Includes miscellaneous appliances, clothes washers and dryers, computers and related equipment, stoves, dishwashers, heating elements, and motors.

## HOW POWER IS SAFELY RESTORED

Please know that when the power goes out, we are doing all we can restore power safely and efficiently. Here are the steps we take in the assessment and restoration process:

**STEP 1: ASSESS THE DAMAGE**

**STEP 2: ADDRESS SAFETY RISKS**

**STEP 3: RESTORE ESSENTIAL SERVICES**

**STEP 4: PRIORITIZE REPAIRS**

## ENERGY EFFICIENCY TIP OF THE MONTH

**Replace standard power strips with advanced power strips to save energy.** Advanced power strips look like ordinary power strips, but they have built-in features that are designed to reduce the amount of energy used by the standby electronics that consume energy even when they're not in use (also known as phantom load).

The National Renewable Energy Laboratory (NREL) estimates that the average home loses \$200 annually to energy wasted by phantom load.
