SUMMER SEL PROGRAMMING TO ACCELERATE LEARNING BY FALL

The latest research predicts that students will start next year more than 20% behind academically because of the "COVID Slide." Districts are searching for creative ways to use summer break to focus on the social-emotional growth of both teachers and students, preparing mindsets for learning in the coming year. EmpowerU is offering special programming that will fuel student growth and resilience, preparing them for learning by fall.

HOW DOES IT WORK?

EmpowerU is proven to help teens make lasting personal change, gain confidence, lower anxiety, increase emotional well-being, and improve friendships, time management and grades.

Students complete daily online SEL lessons that are supported by highly personalized motivational coaching by EmpowerU trained therapists. Each individual licensed instructor builds a trusting relationship with the student and provides daily feedback and encouragement to help students meet goals.

EmpowerU teaches students how to make effective change, one small step and one day at a time, engaging students as active participants in their wellness journey to create lasting change.
